

# Evan Glaser

Software Engineer

Denver, CO • 443-604-9207 • glaser.evan@gmail.com

## TECHNICAL SKILLS

### Languages and Frameworks

Javascript, HTML, CSS // Python  
React, Redux, Express  
Jest, Mocha, Chai, CircleCI, Github Actions

### Databases & ORMs

Mongo & Mongoose  
MySQL & Sequelize  
Postgres

## SOFTWARE ENGINEERING PROJECTS

### Tiger Tracks — Lightweight data visualizer for golfers

React, Express, Postgres, Heroku, Recharts, Puppeteer

<https://tigertracks.herokuapp.com/>

- Configured and utilized a **Puppeteer** web-scraper to seed **Postgres** database with Tiger Woods' relevant statistics
- Designed **Recharts** visualization tool for multifaceted comparison between personal golf statistics and Tiger's

### REI Product Page — Full-stack clone of highly stylized REI product page

React, Express, MongoDB, AWS EC2, Docker, Jest

- Encapsulated business logic in React Higher Order Components and enforced concise, clean code through the use of **React Hooks**
- Deployed three **EC2** instances to achieve Google page load speed score in the 99th percentile
- Unit-tested **React** components with **Jest** to eliminate breaking changes in development

### TripAdvisor Systems Design — Scaled TripAdvisor clone to handle web-scale traffic

React, Express, Postgres, New Relic, k6, Loader.io, EC2, Docker, Nginx

- Refactored functional front-end with **Nginx** to support 1000 req/s at 8ms average response time
- Built, seeded, and optimized a **Postgres** database to contain over 10M primary records
- Completed code-reviews while working on a team in an **Agile** workflow environment using **Git** version control

## PROFESSIONAL EXPERIENCE

### Sales Manager, Cyber Security

**Intezer** — Denver, CO // Tel Aviv, Israel

February 2019 - August 2020

- Developed expertise with malware analysis and cutting-edge reverse engineering tools such as **IDA Pro**
- Opened and managed Denver office, directing sales and operations for western United States and Latin America growing the customer base by 200%
- Evangelized emerging cloud workload run-time protection technologies

### Account Executive

**Darktrace** — Denver, CO

June 2017 - February 2019

- Launched Denver office and manage entirety of sales cycle from lead generation to close with average deal size of \$164,000
- Delivered comprehensive lectures on Bayesian Recursive Mathematics, AI, IoT Security, and more

## EDUCATION

### University of Michigan

Ann Arbor, MI

B.S. Political Science, 2016

### Hack Reactor

Denver, CO

Software Engineering Immersive,  
February 2021

## SUMMARY

Former cyber security sales leader who saw the impact technology can make and decided to learn to build great things himself

## AWARDS & ACHIEVEMENTS

Speaker, Delivered expert-level speeches on cyber security landscape across the country
